Share Configuration

(Note: Sharing process is same in both iOS and android)

> - Login to the Smart Home app
> - Add some device, Configure channels
> - Click on: Menu> Share Configuration *(Available sharing apps will be shown)*
> - Select a sharing media *(Mail, Messenger, Skype, Google Drive, Shareit, Airdrop etc.)*
> - Share your configuration *(Confirmation message will be shown)*

Restore Configuration

(Restore Process is OS dependent, different in iOS and android)

iOS:

> - Login to the Smart Home app
> - Go to the app where you have received configuration file *(i.e. SMS inbox, Mailbox, Skype etc.)*
> - Download/Receive the configuration file
> - After completing receive/download, click on the file *(Open with prompt will be shown, Smart Home app will be an option)*
> - Open the file with Smart Home
> - Synch confirmation message will be shown, Click: Continue
> - Synch will be started and confirmation message will be shown after completion

Android:

> - Go to the app where you have received the configuration file *(i.e. SMS inbox, Mailbox, Skype, etc.)*
> - Download the configuration file, remember the directory where it's configuration file saved
> - Login to Smart Home app
> - Go to: Menu>Backup & Restore
> - Click on: Restore
> - Browse the directory and select your saved configuration file
> - Synch confirmation message will be shown, Click: Yes
> - Synch will be started and confirmation message will be shown after completion
